referenced /“imported” nodes

node x

node y

node z

content

# whats going on

- create a cck nodetype
- nodereference module.
- change the template files for the referenced nodes through `phptemplate_variables`
- instead of `node.tpl.php` we use “whatever”.`tpl.php` for the referenced nodes -when they are displayed inside the cck nodetype
- the referenced node is still using `node.tpl.php` when its rendered.

# cck manage fields

Edit

Manage fields

Label	Name	Type	Weight	Gr
title	title	title	<div>-5</div>	
center-area	field_center_area	Node Reference	<div>0</div>	<div>N</div>
left-area	field_left_area	Node Reference	<div>0</div>	<div>N</div>
right-area	field_right_area	Node Reference	<div>0</div>	<div>N</div>
body	body_filter	body_filter	<div>0</div>	

Update

create the node reference fields

# cck display fields

Configure how this content type's fields and field labels should be displayed when it's

Edit

Manage fields

Field	Type	Label	Teaser	Full
center-area	Node Reference	Above	Title (link)	Full node
left-area	Node Reference	Above	Title (link)	Full node
right-area	Node Reference	Above	Title (link)	Full node

Submit

set the display to full

# cck display fields

View Dev load Dev render **Edit** Clone

**Title: \***

Rocking node ref test
